

I'm asking you honorable judge Frank; to reconsider your decision on my relief. I sent Payments to medfirst bank that was returned, I asked David to call he stated that was not his job, he is only helping out in the Chapter 13. I should have to beg my attorney for stuff that involves my case, how I notice the paper work from the Courts, states Catherine B. Smith she was not who I hired to represent me. Even though she really did take over all David's phone calls in the middle of our conversations, she snatch the phone all the time. I really don't want to go any further in this letter I feel like I was scammed, with to people who never had my best interest, and I never did get the answers I wanted about what was his fee, and why he could not talk to the mortgage company. I feel like these questions should be answer in front of you Judge. To me she are making it seem like I just stop paying. That's why I wanted to be there, and I told them I would be there, but they stated you said, your making the decision at that tm. I have nothing against them but the way they handled me was very wrong. I never had a lawyer to tell me that they will suggest it gets Relief. If my plan was done right the first time I would not have had all this paper work ~~about~~ he says bothered him. also if he would of spoke to the mortgage company for sending payments back, I would not of had that problem. I should of run. know of this is right and now im taking water large. all looks like everything was done against me in this case. I also see a motion ~~against~~ for

the 12/11/2018 with no notice to me at hearing that means it sent against me with out being notified

18-107-107-elf

thanks Savie
